
PROJECT 2 – BUDGÉT

BY DYLAN ROONEY, LAUREN BRIGGS, TOMMY LU, REUBEN

WHAT IS "BUDGÉT"?

- This web app is for people that want to budget their money. How much are they spending? On what? Do they want to limit the amount they spend? With this app the user can see clearly how so much adds up, and how much their spending.

CONCEPT

- This web app is so people can budget their expenses and view how their spending and tracking finances.
- The motivation was when we were throwing around ideas we all thought that a way to help ourselves budget, and keep track of spending, and on what would help us and any users.
- As a user, I want to log into my account, I want to add my expenses and see how much I'm spending in different areas of my life

TECHNOLOGIES

- node.js
- handlebars
- HTML
- CSS
- JS
- SQL
- Sequelize
- Nodemon
- Express
- bcrypt
